

Ci Rear Enclosures

Information Sheet

Ci200.2QS Enclosure

The new range of purpose built and acoustically optimised rear enclosures are designed to provide consistent output from KEF Ci Series loudspeakers wherever they are situated within the installation. Each has been specially created to complement the output capabilities of the Ci Series in-wall/ceiling range, whether round or square. Easy to install at the first fix stage of room construction with variable mounting plate dimensions and fixings to suit any bespoke or standard joist beam configurations.
