The high-sounding Multiroom Sounddeck with Dolby Atmos®

Experience your favourite movies, concerts, sporting events and console games as a room-filling sound experience with the Smart Sounddeck 100. Thanks to its Dolby Atmos certification, integrated DTS HD and 4K- and 3D-compatible HDMI connections with eARC, you can experience TV evenings with the best speech intelligibility and crisp home cinema sound. With the newly integrated Apple AirPlay 2, Chromecast built-in and Spotify Connect, the Smart Sounddeck 100 also becomes a streaming all-rounder in your own four walls in addition to home cinema sound. You can conveniently stream your favourite music from any room with your smartphone or tablet using AirPlay 2, Chromecast built-in and Spotify Connect. The Smart Sounddeck 100 is already a perfect solo entertainer with its powerful drivers. In combination with a wireless Smart Subwoofer or as a home cinema set connected wirelessly with up to 7 additional speakers from the Canton Smart series, the sound deck can also be flexibly

expanded.

Sound from all directions. 3D Surround Sound like in reality.

As an all-in-one device, the Smart Sounddeck 100 already delivers impressive Dolby Atmos surround sound. The room-filling 3D sound surrounds you from all sides and transforms your living room into a home cinema. The integrated Virtual Surround technology allows the sound to be distributed evenly throughout the room without you having to connect additional speakers. Thanks to HDMI connections with eARC and HDCP2.2, your razor-sharp TV picture comes to life with thrilling sound. As multi-channel sound formats, the Smart Sounddeck 100 supports Dolby Atmos®, DTS HD and the video format HDR (High Dynamic Range). You can conveniently set up the Smart Sounddeck 100 via the on-screen display on the TV and adjust it perfectly to your sound preferences at any time.

Music Streaming. In every room.

You can use the Smart Sounddeck 100 as a single streaming speaker or as a member of a home network. You can stream music wirelessly from your smartphone, tablet or PC to the Sounddeck 100 without interruption. Thanks to integrated AirPlay 2 technology and Chromecast built-in, you can play your favourite music in the best quality at the touch of a button. Spotify Connect is also built in, with the option to store your favourite playlist in one of the sound deck's three memory slots and start it at the simple touch of a button. Expand your

CANTON

Smart Multiroom system over time, perfectly adapted to any living room situation. The Canton Smart series delivers top sound for everyone - easily and everywhere.

Expand the Smart Sounddeck 100 wireless to a home cinema set.

With the Canton Smart series, in addition to integration into the WLAN as a Multiroom variant, you can also connect additional speakers individually per room as a Singleroom variant. In this way, the Smart Sounddeck 100 can be wirelessly expanded with up to 7 additional Smart speakers. With these flexible combination options within a room, a fully-fledged home cinema system is created, completely without wiring. Whether as a combination with a subwoofer and two surround speakers or as part of a large 7.1.2 Smart home cinema set - you have the choice to put together the perfect setup for your living room.

Simple operation - also by voice command

In addition to manual operation via the app, you can also start and pause playback, adjust the volume or operate an entire Canton Smart System by voice. Although there are no built-in microphones in the Smart Sounddeck 100, it still offers the highest possible compatibility when it comes to voice control. To operate the Smart Sounddeck 100 by voice, there are several options: Use the Siri or Google Assistant voice assistants of your smartphone or an external Apple or Google device of your choice. This way, you can choose to play your favourite music in any room you want at the touch of a button or by voice.

Easy setup with Apple AirPlay or Google Home App

With Apple Airplay or the Google Home app, the Smart Sounddeck 100 can be set up and managed conveniently from your smartphone. The speaker supports both 2.4 GHz and 5 GHz Wi-Fi connections.

Always up to date with automatic software updates

Once integrated in the WLAN, the Smart Sounddeck 100 always stays up to date with automatic software updates. This means that you can receive all new functions on your device via an update if you wish.

Sound and music playback even without WiFi

If the Smart Sounddeck 100 is not connected to the WiFi, you can still use all its functions as a TV speaker and, if necessary, transfer music wirelessly to the soundbar via Bluetooth.
