Our Townus Serie - zeitlos elegant

For music and movie

Our brand-new Townus speaker series: created for the urban lifestyle - from the heart of the Taunus. We are proud to present the "Townus", with which we would like to appeal to all people for whom timeless design and high-quality appeal are important. In reference to the roots and the location of our company headquarters, in the middle of the Hessian Taunus, we have created the same sounding name Townus for the new loudspeaker models. The newly created Townus series impresses with its timeless, elegant design and its high-quality materials - ideal for urban people who value design and quality. In the word creation Townus, we also refer to the connection between the modern and pulsating life in a town and the rather quiet and rural Taunus, where the creators of this timeless and modern speaker series have their origins.

Clear design

Restrainedly elegant, with harmonious proportions and rounded cabinet edges, the 2.5-way Townus 50 centre speaker catches the eye. The elaborately finished surfaces and the screwless integration of the drivers into the baffle make the Townus 50 centre speaker a jewel in any living room. Its rounded cabinet edges not only give the Townus 50 an elegant look - they also improve the centre's sound dispersion. Flawless surfaces in silk-matt or high-gloss lacquers, as well as fine real-wood veneers with a perfect finish, underline the premium claim of the new Townus speaker series. Further visual highlights are the high-quality aluminium rings of the loudspeaker chassis, which are manufactured in the seamless diamond-cut process, and the fabric panels, rounded at the corners, which adhere magnetically to the baffles.

Always in the spotlight

The Townus 50 bass-reflex centre speaker features a timeless, elegant design and excellent sound characteristics that make it the centrepiece of a powerful home theatre system. Powerful, deep bass, well-balanced tuning and great dynamics make it the perfect centre speaker - with crystal-clear dialogue. The Townus 50 Center is equipped with high-quality technical components: Guarantees for the well-known good Canton sound and an enormously high reliability. Two 154 mm bass-midrange drivers with titanium cone, suspended in the long-stroke, low-distortion wave surrounds, and a 25 mm dome tweeter made of aluminium oxide ceramic with precisely calculated waveguide deliver ideal sound dispersion up to 40,000 Hertz.

CANTON

A strong team

You can expand the Townus 50 centre speaker with other models from the Townus series to create a powerful multi-channel home cinema system. The main speakers are our flagship Townus 90s, which you can combine with the Townus 50 centre and the Townus 30 2-way compact models as surround speakers. For depth and pressure in the bass, as well as an increase in overall dynamics, the Townus Sub 12 subwoofer is added. Here, the high power amplifier output and 300 mm titanium subwoofer chassis ensure impressive performance for movies and music. The smart electronic component Smart Amp 5.1 harmonises ideally with our Townus loudspeaker models, allowing you to take off into the wireless world of music streaming. The Canton Smart Amp 5.1 effortlessly replaces a classic AV receiver and offers an incomparable variety of combinations and connections - with the best sound and minimal dimensions.
