

incredible sound at a reasonable price:

SA will spoil you

SA saxo is a small family of loudspeakers for the economically concerned film and music lover.

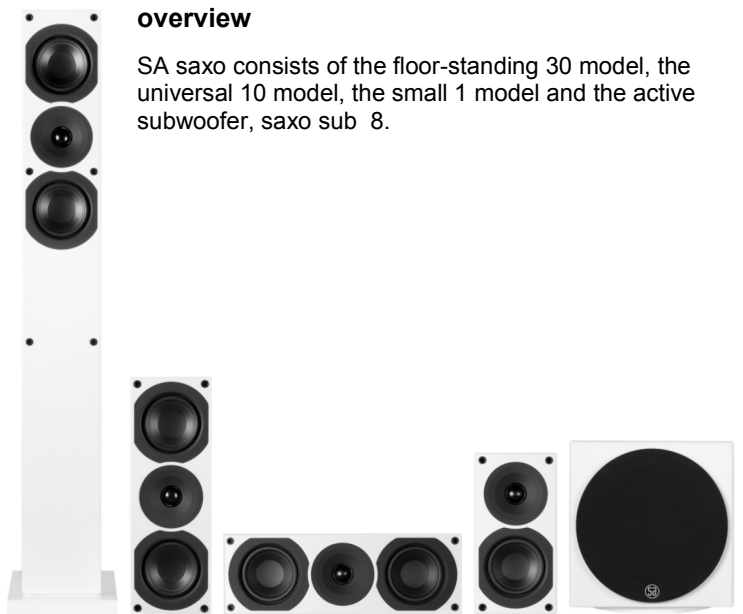

The market's best sound for the price. This is the aim of SA saxo. You can use the speakers with any good music system or home theater, and their surprising sound quality will bring you closer to the artists you love.

created for all

You may like everything from rock, pop, classical and jazz. You may listen to CD, MP3, blu ray, network players and much more. It makes no difference because SA saxo loudspeakers are designed to give you maximum listening pleasure out of anything. All you need is to consider is which model you need. The surprising big sound will spoil you..

overview

SA saxo consists of the floor-standing 30 model, the universal 10 model, the small 1 model and the active subwoofer, saxo sub 8.

SA saxo are the cheapest SA speakers since the mid 1990's!

simplicity is a quality

Few and well-built parts. It is one of the secrets behind saxo. The advantage of simplicity is evident when it comes to the speakers durability, but the simplicity also gives clearly better sound.

big bass from small speakers

The small specially designed woofers provide a big sound, known from larger traditional speakers. This is typical SA.

new technology fills the room with sound

A new feature in SA saxo is the special DXT-lens, centered around the tweeter. The patented acoustic design fills the room with sound and the advantage of DXT is clear. Try to walk around the room and enjoy that you can hear music everywhere.

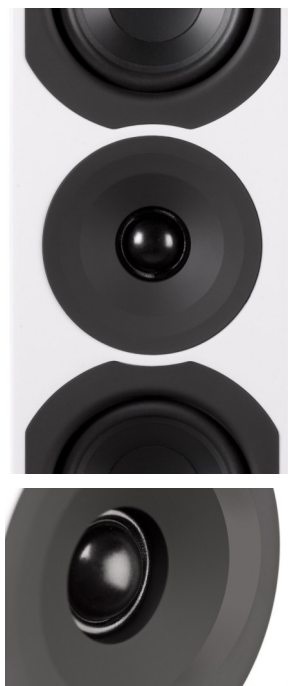

use SA saxo with:

- music systems
- Ipod, network players, multi room or computer when connected to a power amplifier
- 2.1 home cinemas
- 5.1 home cinemas
- 7.1 home cinemas

created by experienced people

There are many speakers at reasonable prices, but very few put their name on them. Meet the people behind saxo.

Chief Designer Ole Withthøft has developed speakers since 1984 and he is responsible for saxo. On the team you also find three acoustical engineers, mechanical engineers and a test team, consisting of trusted employees at SA. This group of experts has created many award winning speakers. Enjoy their skills with SA saxo.

DXT.

SA saxo 30 - only 13 cm wide

The slim saxo 30 model is easy to place in the room where it works well in a music system or as front speaker in a good home cinema.

great quality for the price

The tall design puts the speaker elements into listening height, giving a realistic impression of the sound. Enjoy a speaker with big sound and lots of details to be heard anywhere in the room.

finish: white or black high gloss
power handling: 80 Watts
frequency range (+/- 3 dB): 60 - 25.000 Hz
impedance: 4-8 ohms

SA saxo sub 8 - small and effective

SA saxo sub 8 is really small and shaped like a cube with side dimensions of 27 cm. The small dimensions are in contrast with its impressive bass. Use it in a music system or in a SA saxo home cinema. Built-in amplifier of 100 W.

technical specifications

dimensions (W x H x D) cm: 27 x 27 x 27
finish: white or black high gloss
built-in amplifier: 100 Watts
frequency range (- 3 dB): 40 - 120 Hz

solutions for your home

for music systems or 2.1 systems with active subwoofer

All saxo speakers can be used in your music system, and they can all be extended with the active subwoofer SA saxo sub 8 if you want more bass or have a 2.1 home cinema.

for 5.1 home cinemas

All saxo speakers may take the place as the front, center and rear speakers in your home cinema. It is recommended that you use 1 piece SA saxo 10 in horizontal position as the center speaker. For best results, use SA saxo 30 as front speaker, but the SA saxo 10 and SA saxo 1 may also take this place.

accessories make set-up easier and improves the sound

The wall bracket WB2 fits SA saxo 1 and makes setup easy if the speakers is supposed to hang on the wall. WB2 allows the speaker to be angled in all directions. The small table stand TS1 can be used under SA saxo 10 when you use it as a center speaker. The adjustable angle of the center speaker allows you to get 100% out of the center channel sound.
