

AVIDHIFI

PELLAR™

"Exceptional flexibility
and precision"

The Pellar brings the possibility of owning an AVID phono stage to a new entry level price point.

Unusual at this price level, there are three gain options for MM, as well as low and high gain MC cartridge types. As with its bigger relation this is an un-balanced design, whilst keeping noise exceptionally low, even with an integrated power supply. Distortion across the audio spectrum is kept exceptionally low and with impressive headroom, a character common to all our electronic designs.

In keeping with our high standards, the Pellar is completely manufactured within our own facility. Everything from PCB assembly, testing and quality control to the high quality casework ensures a desirable sounding product with exceptional value.

SPECIFICATIONS

Noise	< -81dB MM <-67dB MC
Distortion	< 0.001%
RIAA	5Hz - 70kHz +/-0.5dB
Gain	48dB - 60dB - 70dB
Resistance	47k - Custom
Capacitance	100pf
Power supply	Internally regulated with 25va transformer
Voltage input	100-240vac 50/60Hz 10 watts max. (depending on region)
Dimensions	120 x 230 x 70mm (WxDxH)
Net weight	1.6Kg (3.5lb)
Packaging	310 x 260 x 110mm (WxDxH)
Shipping weight	2.2Kg (4.9lb)
